

Mad Science FCAT Pak Workshop Series

Here are is some of the feedback we have received from teachers and administrators regarding this program.

We scheduled your group to work with our 5th graders for 8 weeks and our FCAT results were amazing. Our students were given a clear understanding of the concepts and applications and were truly turned on to science. - *Principal, Myakka City Elementary*

Interesting, Fun, Engaging, moving from one activity to the next, it was amazing you fit all that in I hour each session. We learned and enjoyed and students at all levels were able to participate. - *74th St. Elementary*

Thanks for a great 8 week program. It has been an excellent addition to our science curriculum. You have effectively reinforced the concepts that were taught to the students. They enjoyed the program and so did we. - *Myakka City Elementary*

The hands-on activities and engaging experiments really caught the kid's attention. The program was very well thought out and our improved test scores should and will bear that out. Great Job! Thanks for everything. More Mad Science....*South Ward Elementary*

I can't tell you how much our kids look forward to Mad Science coming every week with a new workshop in this program. Thanks for all that you are doing. *Perkins Elementary*

THANKS! The hands-on activities kept the kids engaged and focused, and helped them understand the concepts. Overall a great program. - *74th St. Elementary*

Awesome! Spectacular! Don't change anything about the program. We are definitely going to have you next year. Great Job! - *Brooker Creek Elementary*

This program is so worth it! With everything hands-on, take homes and your animated instructors the students learned and will remember by "doing". Thanks! - *Myakka City Elem*

Just wanted to let you know that I have heard nothing but glowing reports from our teachers and the kids definitely are more excited about science. - *Tara Elementary*

Lots of "I got it" moments for the kids when they do it and see it all come together. All the take homes reinforced the concepts. The students couldn't wait until the next visit! - *Brooker Greek Elementary*

This should be a year long program not just 8 weeks. All the steps of scientific inquiry were addressed and through experiments the kids don't normally see their interest was sparked. We loved it! I wish our school does this with the 4th grade as well next year. - *South Ward Elementary*

A great addition to our science curriculum. The energy and enthusiasm you brought to our kids was great. They would talk about your class for days after you did it. - *Lakeview Elementary*

The program was wonderful! The students really didn't want it to end as soon as it did. We look forward to working with Mad Science again. I will stay in touch and please continue to notify me of anything that would benefit our students at Fairmount Park. - *Thank you!! Math/Science Coach Fairmount Park Elementary*

We want this FCAT Program all year long. Your activities are tied our units of study throughout the year culminating with the FCAT in March. I love this program! *Love it, Love it Love it!* - *74th Street Elem*

We loved how all your activities were very engaging and well organized. We tested with the 4 and then we quickly ordered the 4 additional. Great job! *Academie Da Vinci*

Your FCAT workshops are AWESOME! Very hands-on. Every School should have this program! *Lakeview Fundamental*

Mad Science does a fantastic job of explaining and engaging the students while maintaining control of classroom behavior - Great! *Perkins Elementary*

We use all of the post workshop summaries and quizzes you supply and find them very helpful. I actually give the kids the quiz before then when we come back. It is very interesting to see how much they do really learn when they are with you. *Lakeview Fundamental*

Your Hands-on activities engage the students and encourage a love of science. The mad scientists are wonderful and the kids love going to class! They are of very "high Interest". Thanks for providing this extremely, motivating, and enthusiastic approach to science. *Toledo Blade Elementary*
